

Tanzania & Kenya Luxury Safari

Please note that all of the itineraries listed in our web site are actual private tour itineraries we have prepared for clients over the past 12-18 months. In the very nature of what we do, each private tour itinerary is custom, exclusive and unique unto itself. Our over-riding goal is to create lifelong memories that you and your family will forever carry deep within your hearts.

Overview

Though South Africa, Botswana, Namibia, Rwanda, and Zambia may be our favorite high-tech safari destinations over the past few years, we certainly cannot overlook the uniqueness of Tanzania's Ngongoro and Serengeti wildlife areas. There is no roughing it here as the 5-star Sanctuary Tented Camp, Ngongoro Great Lodges, Singita Sabors Tented Camp, and Singita Fery Fery Lodge all offer a custom luxury experience. The flagship wildlife feature of Ngongoro is the Ngongoro Crater, home to over 260,00 animals, including the "Big 5". Complementing Ngongoro is the iconic Serengeti National Park and the Mara River in the Masai Mara National Reserve, where, though becoming increasingly less predictable, two million wildebeests usually pass through from mid-June to August.

For our clients passionate about hiking, we may offer a seven-day ascent up Mt. Kilimanjaro via the Machame Route offering the challenge of a lifetime, but much rewarded by a relaxing, luxury safari experience after!

Seven-Day Ascent up Mt. Kilimanjaro

Climbing Mt. Kilimanjaro via the Machame Route

As the highest mountain in Africa, with its summit being approximately 28,120 feet from its base and 19,341 feet above sea level, it is no wonder why bucket lists of avid climbers and hikers worldwide feature Mt. Kilimanjaro in Tanzania. Kilimanjaro can be climbed year round, however, we feel it is best to climb when there is a lower possibility of precipitation. The dry seasons are from the beginning of

December through the beginning of March and from late June through the end of October. These are considered to be the best times to climb in terms of weather. Please note that large animals are rarely seen and are more frequent in the forests and lower parts of the mountain.

Though there are six main trekking paths used to climb Mt. Kilimanjaro, we feel the nine-day/eight-night Machame Route, with a seven-day ascent, to be the best option. To read more about this journey and day-by-day itinerary, please read our blog post: [here](#).
